

I am against the Broadband over Powerline (bpl) proposed rulemaking. I am an Amateur Radio Operator, who makes use of VHF and HF frequencies. Broadband over Powerline will make the reception and use of my license impossible as I am licensed to operate (transmit and receive) in the Amateur Radio Frequencies. The FCC exists to protect the frequency spectrum we all use and depend upon. Yet the FCC is at the forefront of pushing (embracing) BPL into existence which will in effect splatter other service frequencies. IS THIS NOT A CONFLICT OF INTEREST ?????? Further testing with all AVAILABLE RESOURCES (THE ARRL-THE AMATEUR RADIO RELAY LEAGUE and other resources Worldwide) should be accomplished before BPL ruins the spectrum for me and the rest of the 650,000 other Amateur Radio Operators and other services that depend on the High Frequency spectrum allocations, for health and safety.
